Jellinek curve printable

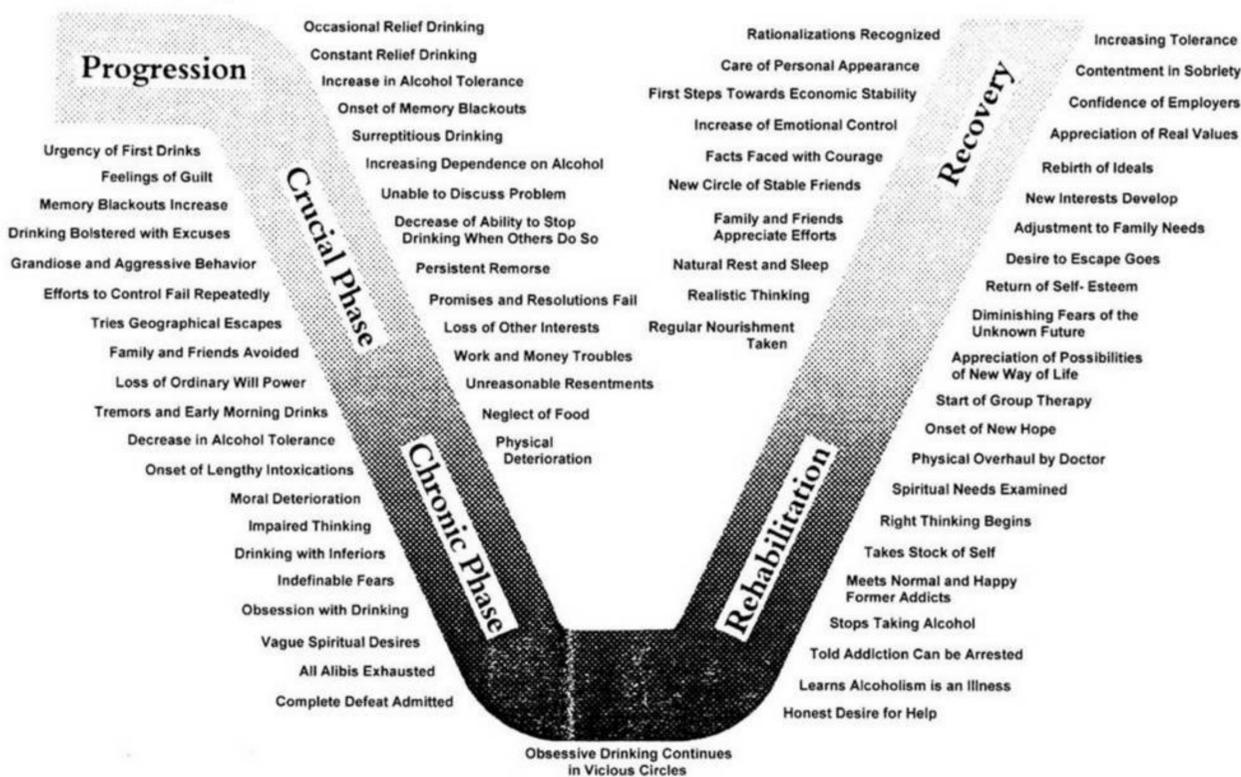

The Jellinek Curve, created by E. Morton Jellinek in the s and later revised by British psychiatrist Max Glatt, is a chart that describes the typical phases of alcoholism and recovery. The point of this research was to show that alcohol addiction is a progression and there's a "vicious circle" associated with obsessive with much. Perhaps the best model of these changes is what is sometimes referred to as a "Jellinek Curve" or progression curve of addiction. Demonstrated below is a standard progression curve which can be applied to both alcohol and drugs. Understand, however, that progression rates and how long it takes to reach the bottom of the curve, do sometimes. Elvin Morton "Bunky" Jellinek (15 August – 22 October), E. Morton Jellinek, or most often, E. M. Jellinek, was a biostatistician, physiologist, and an alcoholism researcher, fluent in nine languages and able to communicate in four others..
